**Get your large or extra-large
order of plasmid DNA!**

Dear customers,

You have tried and tested your synthetic genes successfully. You know they work the way you want to but ... you find you have used up the few micrograms you received for initial experiments.

No time, capacities nor manpower to do all the plasmid DNA work-up yourself?

NO PROBLEM!

Go back to the source and ask for ATG's plasmid production service: we can deliver anywhere from 25 µg up to 1 mg of **high-quality plasmid DNA** of your synthetic genes.

Ask for our competitive quote!

Within 1 to 2 weeks you will have plenty of plasmid DNA to continue your valuable research (if synthetic gene construct is available as frozen stock).

ATG, your reliable partner in synthetic biology!

Complementary services:

- **Computational optimization: genes, gene cassettes, gene assemblies**
- **Synthetic bioinformatics for expression optimization**
- **(Meta)Genomics Analyses**
- **Gene synthesis**
- **Multi-protein and peptide expression systems**
