Gene Synthesis and Optimization: more than just toying with codon usage

15 Mai 2014

ATG's gene optimization service – improve your results! **First check then act!**

Use ATG's gene check service for free!

Provide us your gene for the assessment of formal-functional sequence features – either by e-mail or our [online tool](#) - then get the link to the visualized results of the gene check - online - for your inspection.

Contact ATG for getting an interpretation of the results.

From straightforward codon optimization of single genes to designing and streamlining entire complex pathways - we have solutions at every level! ... [just inquire](#)

Trying to re-establish that biosynthetic pathway in a heterologous hosts but it just doesn't give you the yields you wish?

[Read more](#)

Our complementary services:

- design of gene constructions (bacteria, mammalia, insect cell systems and more)
- gene synthesis for genes, gene assemblies, etc.
- multi-gene expression systems
